

**For Immediate Release**

## Onefive participates in EU-Project "PHASORS"

Zurich, Switzerland, January 16<sup>th</sup>, 2009 – Onefive GmbH, an innovative supplier of ultrafast and narrow-linewidth single frequency lasers, participates in the EU Project "PHASORS" (Phase Sensitive Amplifier Systems and Optical Regenerators and their applicationS), launched in summer 2008 under the 7<sup>th</sup> framework program (FP7). The technology being developed in PHASORS will deliver components to meet new communications challenges such as Phase Sensitive Amplification which has the potential to substantially improve the transmission capacity.
